Welcome to WAMPEX 2025

The annual West African Mining and Power Conference & Exhibition is here again, and the Ghana Chamber of Mines is pleased to welcome with the all-important mining and power conference and exhibition in the sub-region.

WAMPEX is an international networking Conference and Exhibition for the mining and power industries in West Africa that pools together executives of companies in these sectors, West African Ministers for mining and power, international and local investors, NGOs, researchers, and traditional leaders.

This year's theme: "Driving sustaining investment opportunities in West Africa" will reinforce the all-important question of how businesses in the mining and power sectors remain viable in the face of economic challenges whilst at the same time providing the hallmark for the transformation of the sub-region.

WAMPEX has always provided a platform for the introduction of new suppliers, new technologies, and new techniques to West Africa's mining and power industries under the competent auspices of the Chamber. This event has therefore increasingly become Africa's main platform for thought leadership in deliberating deeply on both mining and power sector issues.

It is our expectation that the 2026? WAMPEX will provide a unique opportunity for stakeholders to identify, showcase and benefit from sustainable models to improve business efficiency for steady growth in spite of prevailing bottlenecks.

We welcome you.

Ahmed Dasana Nantogmah
Ag. CEO, Ghana Chamber of Mines

Welcome to WAMPEX 2025

Dear Attendees,

It is my sincere pleasure to welcome you to the 18th edition of **WAMPEX**. Your presence here is greatly appreciated, and we're thrilled to have you join us for this momentous event.

On behalf of DMG Events, Ghana Chamber of Mines, and Events & Projects International, we extend our warmest greetings and wishes for a prosperous and productive three days.

We are excited to unite industry leaders, innovators, and stakeholders from across the region to explore the latest advancements in the mining and power sectors. This year's event is particularly special as it marks 31 years since our first gathering and is the largest WAMPEX ever hosted, featuring over 200 exhibitors from more than 20 countries. We encourage you to make the most of your visit by sourcing from thousands of products, networking with industry professionals, and participating in our many workshops.

A heartfelt thank you to the Ministry of Land and Natural Resources, The Mineral Commission of Ghana, and The Energy Commission for their invaluable support over the past 31 years. Their contributions have been instrumental in ensuring the event's relevance and success.

This year's conference remains the premier platform for innovation, collaboration, and expertise exchange in the mining and power sectors. The sessions will feature industry experts, thought leaders, and policymakers engaging in insightful discussions on critical topics.

Don't miss out on our WAMPEX Innovation Hub's free technical workshops, where leading industry professionals will share cutting-edge technologies and insights. Be sure to mark your calendars for the workshops that interest you.

To all WAMPEX 2025 participants, we wish you a highly valuable and successful event. Let's move forward together towards a sustainable and prosperous future for West Africa's mining and power industries!

Warm regards,

Adele Tolken

Meet the 2025 Sponsors and Exhibitors

The Delegation of German Industry and Commerce in Ghana is part of the worldwide AHK German Chamber Network. As a Delegation, it is the preliminary stage for a bilateral Chamber of Commerce.

The Delegation is closely connected to the Chambers of Industry and Commerce (IHKs) in Germany. Together, they support German companies with promoting and extending their business relations to foreign countries. The umbrella organisation of the IHKs is the German Chamber of Commerce and Industry (DIHK), which also coordinates and supports the AHKs and Delegations. Furthermore, the cooperation with various German trade associations strengthens the link between AHKs and business markets.

APS Pump is manufacturer which produces dewatering pumps for mining, agriculture, industry, construction sites and municipalities. Pumps is produced with diesel engine or electric motor. There are three options soundproof canopy, trailer mounted and skid mounted. We use two methods for priming; diaprim and jetprime.

<https://apspompa.com>

AngloGold Ashanti is a global gold mining company with a diverse, high-quality portfolio of operations, projects and exploration activities across 10 countries on four continents. We pursue value-creating opportunities involving other minerals, where we can leverage our existing assets, shareholdings, skills and experience.

At the end of 2024, our diverse portfolio included:

11 operations in Argentina, Australia, Brazil, the Democratic Republic of the Congo (DRC), Egypt, Ghana, Guinea and Tanzania. Greenfield projects in Colombia and the United States at May 2025. Greenfield exploration in Argentina, Australia, Brazil, Egypt, Tanzania and the United States. While focused primarily on gold mining, we pursue value-creating opportunities involving other minerals when we can leverage our existing assets, shareholdings, skills and experience.

<https://wayoeltd.com/>

Enabling the sustainable and efficient delivery of the natural resources essential to create a better future for our world.

Metals power the world. They are the backbone of our modern society. And metals are vital for a sustainable future too – copper for decarbonising and electrifying transport; lithium, nickel and cobalt for batteries and energy storage; iron and aluminium for the infrastructure to support widespread electrification.

Today, much of the metal used each year is extracted from our earth, and that is set to continue for decades to come. That's why our customers in the mining industry are transforming to more sustainable practices and striving for Net Zero emissions.

<https://www.global.weir/>

For over 30 years, Wenco International Mining Systems has worked with mining companies to extract unrealized value.
